## ABOUT US

**Accrete Group** is a new age consortium formed with a purpose that's well expressed in its name, gradual and collective growth of every respective individual/entity associated. The team has collective industry experience of many years in multiple fields like Stone Manufacturing, Exports, Real estate, Construction, Hospitality, IT and Agri-Food Retailing. Having identified various bottlenecks and opportunities in various fields from the industry experience, Accrete Group is working towards converting them into business ventures through knowledge sharing and extended collaborations, aimed at developing products and services that would not only address the industry issue, but also grow organically into profitable business ventures. AG Stone Consulting is one such venture.

**AG Stone Consulting** is the first ever and only surface consulting company in India. While it is a known fact, that Natural Stone Industry, like many other product-based industries in the country is highly unorganised, yet clocks multimillion dollar revenues annually. AGSC, through its products and services tailored specifically for the surfaces industry, aims at establishing and standardizing some industry level practices, which would enable all the parties involved (from manufacturers to end customers) to have a seamless buying/selling experience and assure them of best value in terms of being able to deliver the right/desired quality at the most optimum market price.

# A NEW AGE CONSORTIUM

STRIVING TOWARDS THE COLLECTIVE GROWTH OF ALL OUR ASSOCIATES

# AG's SOP FOR SELECTING RIGHT SURFACE

**STEP 1** - Identify Purpose, if the requirement is for Flooring, Countertop, Landscaping, Elevation, etc. and intricate details pertaining to possible usage, wear and tear, budget, etc.

**STEP 2** - Decide on the base colours and surface pattern desired for, based on personal taste and aesthetic expectation

**STEP 3** - Finalize type of stone based on Steps 1&2 and request for physical samples (to be sent within 48-72 hours) to have real time look, touch and feel experience

**STEP 4 - STFQ Call:** Finalize Size (*based on need and availability*); Thickness (*based on usage purpose & possible usage/ footfall*); Finish (*based on usage purpose and aesthetic expectation*); Quantity (*based on total requirement + wastage calculation*)

**STEP 5** - Request for Quotation for the finalized product selection and get the best in market price for your tailored requirement

**STEP 6** - Place your order to initiate production and get regular updates and pictures of the same from our team

**STEP 7** - Have the product delivered and unloaded at your site in the presence of our staff

# WHY AG STONE CONSULTING?

**End to End Assistance:** Industry experts from our team upon identifying your purpose, requirement, choice and budget will help you with picking the right surface suiting your need and will stay connected assisting you with all your requirements right till the product is delivered

**Assured Quality:** On field Quality Inspectors will inspect material at the factory units to make sure the right quality material as committed to and agreed upon by the customer is what gets dispatched from the factory. Inspection pictures videos would be shared with customers for approval and to maintain transparency

**Assured Best Price:** With no retail store or stockyard locally, we intend to pass on the cost advantage in comparison to local retailers directly to our end customer, thereby assuring best price for the desired quality. Additionally, we follow Make to Order system to avoid unnecessary overheads, thereby avoiding the whole scenario of having to transfer this cost burden on to our end customer either through increased pricing for quality products or by selling below par quality products at market prices, which is a very common market practice in the present day.

**Source to Site Delivery:** Material is sourced directly from own quarries and factory units or from associate factories that we've been exporting from for the last 2 decades and delivered straight to the end customers' site location, with no involvement of any middlemen

# KNOW YOUR STONE

**Natural:** The naturally occurring original surface texture, as gifted by Mother Nature. Ideal for outdoor usage, specially landscaping and for natural elevations. Recommended in Slate, Limestone, Sandstone, Pebbles and Granite Cobblestone

**Polished:** Smooth, shiny and reflective texture. Further emphasizes the colour of the stone and reduces porosity extensively. Ideal for indoor flooring and countertops. Recommended in Granite, Quartz and Marble

**Honed:** Slightly more subtle in terms of reflectiveness, smooth matte or satin like texture. Equally suitable for both indoor and outdoor flooring.

**Brushed:** Gives a textured finish, with an aged appearance to the stone by slightly diluting its colour. Ideal for outdoor flooring and landscaping. Recommended in Limestone

**Leather/Half honed:** More of an elevated textured appearance, while maintaining the smooth surface and non-reflective finish. Ideal for outdoor flooring, countertops and landscaping. Recommended in Granite and Limestone

**Tumbled:** Gives an antique/aged look overall with smoothed edges and subtly textured surface. Ideal for landscaping. Recommended in Limestone, Slate and Sandstone

**Flamed:** Gives a rough grainy surface with faded colour and natural appearance. Ideal for parking areas and landscaping. Recommended in Granite

# EDGE FINISHES

## HANDCUT

Keep it natural, cut by hand it is tapered so ideal for tiling and cobbles with rough inter tile spaces.

## STRAIGHT HANDCUT

This is handcut edge without tapering generally used when showing the crudeness of table tops and steps.

## MACHINE CUT / SAWN SAWN

by machine

## CHAMFERED

Edge are angled, which makes the sharp edge smooth chamfered can be done at different angles as per requirements, EX:- 1mm, 2mm, 3mm, etc.

## FULL BULL NOSE

The edged is rounded corners. A perfect product for stair treads, counter tops, etc.

## HALF BULL NOSE

Half rounded edge are in between straight cut and full bull nosed edges.

## 1/4 ROUND

Minimal rounding is done to remove the sharpness of the straight edged tile.

## COPING EDGE

Top your wall or pool to make a statement.

## CHISEL

This gives the stone edge a rough yet uniform surface with chiselled texture.

## BROKEN (TOP VIEW)

Break free from geometry naturally broken, used for crazy paving in flooring or cladding.

# OUR SERVICES

## A. SURFACE CONSULTATION FOR PROJECTS

If you are an Organisation/Owner/Purchase Head looking to purchase natural/engineered stone for your construction project, this particular service has been tailored just for you! Here's why:

**No more running errands to stores for finding suitable stone options.** Upon understanding your purpose, basic preferences and budget, we will get samples of all suitable options delivered at your office

**No more uncertainty with regard to material quality.** As all of our material is made to order, and we will be well informed of your required quantity, we will plan our processing accordingly and ensure that the same quality material as approved by you is delivered to you for the complete order, even if it means multiple dispatches over an uncertain timeframe

**Material Planning Assistance to avoid over stocking at site.** In bulk quantity requirements, one of the most common problems faced by the construction industry is over stocking of material, which leads to space restriction at work site and also increases the risk of material damage. We will work closely with your project management team to understand the overall material requirement and available resource for laying, and there by calculate the optimum quantities to plan and schedule dispatches over a calculated time frame to ensure efficient execution

**Dedicated Key Account Manager would be assigned** to make sure all your requirements are met, and all our promises are kept

**Assured Best in Market Price for Desired Quality**

## B. ARCHITECT PARTNERSHIP

If there's anyone out there that can really add any beauty to the already beautiful stones sourced from Mother Nature, it's the Architects, the artists of this space! If you are one, we would love to associate with you in making places beautiful and be a part of your story.

## C. MANUFACTURING UNIT (VENDOR) PARTNERSHIP

Are you a Quarry/Factory owner processing any kind of natural stone? We are really looking forward to seeing your products and promoting them within our vast customer base.
